Islamabad, Pakistan

linkedin.com/in/haziqbaig31

Software QA Engineer with 2+ years of experience delivering end-to-end quality assurance across web, mobile, and blockchain platforms. Proven track record of independently owning the full STLC — from test planning and execution to defect management and release sign-off — across 8+ live products in the Web3, DeFi, and AI sectors. Experienced in API testing, performance testing, and cross-platform validation, with a dual background in project management that enables close collaboration with developers, designers, and stakeholders to ship secure, high-quality software on schedule.

EXPERIENCE

Software QA Engineer — Quecko Inc.

Islamabad · Aug 2024 – Present

- **Gems Trade (Centralized Crypto Exchange, Web & Mobile):** Designed/executed test strategy across all modules; validated real-time market data (price feeds, 24H change, volume, market cap, BTC dominance, ETH gas, Fear & Greed), limit/market orders, order book, PnL, and order history; tested wallet security flows (deposit, withdrawal, bulk sell-all modals). **100+ screens, web/mobile parity verified.**
- **JONI (Personal AI Computer, Web & Mobile):** QA Lead across 10+ modules; test plans in TestRail (functional, regression, smoke, UI/UX, security); validated multi-step auth (email, Apple, Google, OTP, reset) and multi-chain payments (ETH, Solana, Tether, card) via Postman; tested AI agent marketplace and real-time multi-agent chat; verified enterprise dashboard; cross-referenced **50+ Figma screens vs live builds.**
- **Flash Wallet (Mobile):** Owned full QA lifecycle solo; complete TestRail suite; validated all wallet APIs via Postman with **zero data leakage verified**; security-first testing of fund-movement edge cases.
- **Tomi (Web3 Super App + AI Wallet):** End-to-end functional/regression/UI-UX in TestRail (crypto txns, voice commands, decentralized storage); Postman API testing (wallet txns, identity, messaging); per-sprint smoke/sanity and Jira triage.
- **DOP (Data Ownership Protocol Oracles, Blockchain):** Managed end-to-end QA; TestRail suite for data-feed accuracy, staking, dispute resolution; Postman tests confirming **on-chain data integrity**; regression after each protocol update.
- **Gems Rocks (Memecoin Launchpad, Web3):** Full TestRail suite (token creation, bonding curve, first-trade, wallet integration); **performance/load testing** for high-traffic launches; Postman API testing and Jira defect tracking.

Shopify Developer & QA Intern — OptiExperts

New City, Pakistan · Dec 2023 – Feb 2024

- Built AddToCart functionality in JavaScript; ran functional and UI testing via Chrome DevTools.
- Performance optimization improving Core Web Vitals; Agile collaboration tracked in Jira.

SKILLS

QA Methodologies

STLC, SDLC, Agile/Scrum, test planning, test case design, bug reporting.

Testing Types

Functional, regression, smoke/sanity, performance/load, UI/UX, API, security.

Tools

Postman, TestRail, Jira, Trello, Asana, Chrome DevTools, Remix (Smart Contracts).

API Testing

RESTful APIs, request/response validation, authentication testing, error handling.

Blockchain / Web3

Smart contract testing, on-chain flow validation, wallet & DeFi platform QA.

Languages & Data

SQL (joins, select, data validation), JavaScript, React, C# (project-level).

AI Tools

Claude, Gemini, Cursor (AI-assisted test planning & workflow automation).

EDUCATION

B.Sc. Computer Science

University of Engineering and Technology, Taxila
2019 – 2023 · CGPA 3.34 / 4.00

CERTIFICATIONS

- C# for .NET Developers (Coursera)
- Programming with JavaScript (Coursera)
- Introduction to Front-End Development (Coursera)
